SOFTWARE PROJECTS

Personal Website: <https://myles2.github.io/MJ-Projects> (for additional information and projects)

- This portfolio page is one of my greatest projects that hosts my other projects.

CHORE DOOR GAME

- Developed a functional webpage game that uses HTML, CSS, and JavaScript.
- The game has functions for all types of scenarios, for when requirements have or haven't been met.
- It also has a button that displays “good luck” but changes depending on if you win or lose.

RAVENOUS ~ YELP-LIKE WEBPAGE

- This project is created through the React framework and uses multiple components that work together.
- It uses Yelp's API to display the given information of a certain business according to the user's set parameters.

MESSAGE MIXER

- This project uses JavaScript to manipulate a given word or sentence in various ways.
- It uses user given keys to manipulate the input in specific ways throughout the 9 different options.

SURVEY FORM

- Created a survey page that takes in the user's information with various types of data forms.
- The survey form won't submit until the required input has been filled out for important information.

OPEN SOURCE: GITHUB

- I participated in 2018's Hacktoberfest completing the hacktober challenge.
- My most recent contribution was a privacy policy page for a weekly React newsletter webpage.

CERTIFICATIONS

Free Code Camp

OCT, 2018

- **Responsive Web Design** - <https://www.freecodecamp.org/certification/myles-jr/responsive-web-design> Through the process of obtaining this certification which took +400 hours I was able to learn, and understand crucial elements in developing functional webpages, and created many personal projects.

SKILLS

- **Software** (proficient): HTML/CSS, JavaScript, Git, Command Line (familiar): Python, C
